INET Meetings

INET Kathmandu 17-18 March
Kathmandu, Nepal

- Brought together International agencies, (including UN ESCAP) and local stakeholders involved in emergency planning, emergency services, disaster management and related work. It specifically focused on the role of ICTs during a disaster.
- 200 on-site attendees

INET San Francisco 18 February
San Francisco, United States

- Internet of Things (IoT) theme
- Presentations were made on IoT issues specifically the challenges and opportunities of a more connected world in areas of privacy, security and interoperability.
- Vint Cerf was a speaker
Advancing Development in Africa: African Domain Name System (DNS) Forum

Marrakech, Morocco 4-6 March

• The theme of the forum was “Strengthening Partnerships for the development of the African Domain Name”
• > 90 participants from 28 different countries attended
• > 800 others followed the event via Livestream link
• Kathy Brown and Dawit Bakele were keynote speakers
Launching Internet Exchange Points (IXPs)

Madagascar Internet Exchange Point (MGIX)

Antananarivo, Madagascar
17 March 2016

The MGIX officially launched on March 17. This IXP is a result of the ISOC-AXIS partnership and collaboration with Packet Clearing House (PCH). The IXP has 6 networks connected, with a D Root, and PCH services available to peers.

AXIS Workshops
Malabo, Equatorial Guinea
15-18 March

Workshops were conducted, training 42 people in the IXP Best Practices workshop and 31 people in the IXP technical assistance workshop.
Capacity Building thru Internet Leadership

E-Learning
Launched self-paced tutorials of IPv6 and Spam online courses.

More than 500 users for IPv6 with minimal promotion. Tutorials are in English and Spanish and available on the Internet Society website https://www.internetsociety.org/tutorials

IPv6 tutorial also accessible through Deploy360.

IETF Tech Fellows Survey

Data collected assessed:
• Promotion of IETF and open standards in home
• Contributions to IETF
• Engagement in other technical and policy discussions and with ISOC
• Opportunities for further improvements to the programme
Restoring Trust in the Internet
Unifying our Work on Trust

First cross-organization trust coordination group created to chart an integrated course for our trust activities for maximum impact.

Situational awareness, watching for gaps or duplication, combining efforts.

We’ve set sail and are on course to restore trust in the Internet as a team.
Bringing together Security Technology and Academia thru NDSS

NDSS 2016 by the numbers:
• 362 - Total registrations
• 29% student participation
• 33% international participation
• 20 countries represented
• 60 Peer Reviewed Papers published
• 17 US-based travel grants provided by the NSF
• 4 International travel grants provided by ISOC
Advancing ISOC’s Security & Privacy Agenda
